

SSAB LINEAR CUTTER STAPLER

Three different staple line lengths of reloading unit, 60mm, 80mm and 100mm, addressed to various tissues

Locking handle design, can be used in one hand operation

Panther SSAB

Tissue end position

Other brands

Tissue end position

Tissue end position, ensures the tissue to be effectively stapled after cutting, much safer

Gap control system, ensures the staple perfect B shape formation from proximal to the distal end

Adjustable firing knob:
Ability to fire from either side of stapler, flexible and easy to use

Blade protector and cartridge safety lockout:
White plastic protector covers blade before and after reloading unit fired, which prevents surgeon or assistant cutting finger on reloading unit blade

White plastic automatically pops up after reloading unit is fired, which prevents clamping on already fired reloading unit, much safer

New blade with each cartridge:
Guarantees effectively cutting, reduces tissue trauma, avoids cross contamination

Floating reloading unit design:
The reloading unit floats above the edge of the fork before closing the stapler fully, avoids mis-firing
